

REMARKS

The following remarks are responsive to the Office Action mailed November 10, 2005.

Claims 1-82 were originally presented. Upon a restriction requirement, Claims 1-23 and 78-82 are currently pending.

Information Disclosure Statements

In reviewing the Official File Wrapper on Private Pair, Applicant notes that seven (7) Information Disclosure Statements were submitted by Applicant and received by the Patent Office as noted below. As the Examiner did not return signed and initialed 1449 forms in the present Office Action, Applicant – by way of courtesy copies – submits the following as Exhibit attachments to the present Amendment:

Exhibit A – A print-out of the File History from the USPTO Private Pair, showing the receipt of seven (7) Information Disclosure Statements.

Exhibits B-H – Copies of the 1449 forms submitted by Applicant and received on the following dates: 05-15-2002, 05-25-2002, 10-11-2002, 03-06-2003, 04-02-2003, 04-15-2003, and 07-15-2003 respectively.

Applicant respectfully requests that the Examiner consider the references listed in the attached 1449 forms and return signed and initialed copies in the next Office Action.

Missing Oath and Declaration:

The Examiner notes that the Oath and Declaration appears to be missing the application papers. Applicant's review of the Image File Wrapper on Private Pair appears to confirm the Examiner's observation.

Apparently, the application was filed originally without an executed Oath and Declaration. A Notice to File Missing Parts was mailed to the Applicant on February 14, 2002 – which indicated that, amongst other items, the Oath or Declaration was missing and, further to avoid abandonment, such items were to be submitted within two months (i.e. April 14, 2002).

The next item appearing in the Image File Wrapper on Private Pair is listed as "Transmittal to TC" on March 25, 2002. This Transmittal is annotated on the paper as being "Copy of Papers Originally Filed" which purports to be a copy of the Notice to File Missing Parts. Printed thereon appears to be fees received by the Patent Office in the amounts of "FC 201 [...] 370.00"; "FC 205 [...] 65.00"; "FC 203 [...] 558.00" and "FC 202 [...] 504.00". These fees appear to have been paid to the Patent Office no later than "03/27/2002" (as printed on the Transmittal). Additionally, these fees appear to be the correct amounts for the missing fees – after applying the small entity reduction to the fees. A copy of this Transmittal – as well as the transmittal sent by Applicant showing fees and Oath mailed on March 14, 2002 -- is attached as Exhibit I to this Amendment.

Further, Applicant is attaching to this Amendment a copy of Applicant's submission to the Patent Office in response to the Notice to File Missing Parts as Exhibit J. As may be seen, a fully executed Oath and Declaration was submitted by Applicant received in the Patent Office on March 25, 2002 – as evidenced by the

returned and stamped self addressed postcard. A true copy of the earlier submitted Oath and Declaration received in the Patent Office is being attached to this amendment as Exhibit K.

Applicant therefore believes that the Oath and Declaration has been properly submitted and that – unless Applicant hears otherwise from the Examiner – that no further action on this issue is required.

Claim Rejection under 35 USC § 112:

The Examiner has rejected Claims 1, 6, 11, 19, 24, 78, 81 and 82 under 35 USC 112, second paragraph, as being incomplete for omitting essential steps, such omissions amounting to a gap between the steps. (see MPEP 2172.01).

Applicant respectfully avers that – with the present amendment to Claims 1, 6, 11, 12, 13, 19, 78, 81 and 82 – the present rejection is now overcome. Applicant believes that the Examiner mistakenly rejected Claim 24, as Claim 24 was withdrawn from prosecution.

Claim Rejection under 35 USC § 103:

The Examiner rejects Claims 1-23, 78-82 under 35 USC 103(a) as being unpatentable over Satoshi (JP 06-214250).

Specifically, the Examiner states that – as to Claims 1, 6, 11, 19, and 78 – Satoshi discloses a display displaying images as a plurality of red pixels, green pixels and blue pixels, comprising: red pixels and said blue pixels by one-half. The Examiner

cites paragraphs 0002 and 0004 in the machine translation of Satoshi available from the Japanese Patent Office in support of this proposition.

The Examiner notes that Satoshi does not teach a green pixel from the red and blue pixel to offsetting. However, the Examiner avers that it would have been obvious to have offsetting any other pixels from each other would have done the same type of offsetting from each other as taught by Satoshi's because it would have better resolution.

As to Claims 1, 6, 11, 19 and 78 – as currently amended, Applicant respectfully traverses.

Claims 1, 6, 11, 19 and 78 require, among other limitations, that input image data be subpixel rendered into output image data which is then displayed as a set of logical pixels.

Applicant's reading of Satoshi does not reveal any teaching, disclosure or suggestion as to what Satoshi does to the image data itself in order to render the image as a superposition of the two images.

By contrast, Applicant discloses – in Figures 10 through 16 and Figures 21 through 23 and paragraphs 0051-0060 and 0063-0067 – how the input image is subpixel rendered into output image data for proper superpositioning of image data onto a projected display.

As Satoshi does not teach, disclose or suggest such a claim limitation, Applicant respectfully avers that the present rejection to Satoshi is now overcome and that Claims 1, 6, 11, 19 and 78 should be passed through to allowance.

As for Claims 2-5 and 7-10, the Examiner finds that Satoshi shows the display is a projector and said offsetting is completed optically and mechanically and electrostatically and magnetically. The Examiner cites paragraph 0006 in the Satoshi translation for support for this proposition.

Without further rebuttal from Applicant, Applicant notes that Claims 2-5 and 7-10 depend from allowable Claims 1 and 6 and, as such, are themselves allowable.

As for Claims 12-18, 79-82, the Examiner finds that Satoshi shows monochrome beams are convergent by less than about 50-75% and [a] plurality of monochrome beams are light beams; and wherein said imaging surface is a projection screen using a projector. The Examiner cites paragraph 0002 in the Satoshi translation for support for this proposition.

Without further rebuttal from Applicant, Applicant notes that Claims 12-18 and 79-82 depend from allowable Claims 11 and 78 and, as such, are themselves allowable.

As for Claims 20-23, the Examiner finds that Satoshi shows [a] plurality of electron beams is performed using electrostatic deflection is performed [sic?] using magnetic deflection of electron beams comprises a beam exciting substantially red emitting phosphors, a beam exciting substantially green emitting phosphors, and a beam exciting substantially blue emitting phosphors. The Examiner cites Figures 2 and 3 and the description of these Figures in the Satoshi translation for support for this proposition.

Without further rebuttal from Applicant, Applicant notes that Claims 20-23 depend from allowable Claim 19 and, as such, are themselves allowable.

Conclusion

In view of the foregoing amendments and remarks, Applicant respectfully submits that all pending Claims are patentable over the cited art of record and are in condition for allowance. Therefore, Applicant requests the Examiner to reconsider and withdraw the outstanding rejection and pass this application to allowance.

If the Examiner believes a telephone conference would expedite the allowance of the claims, the Examiner is invited to contact Stuart P. Kaler at (707) 824-2487.

Respectfully submitted,
